NEXT MODULE

- **Big Picture**
- **Details**
- Registries
- **Best practices**
- Recap

Building New Images NEXT MODULE (Containerizing an App)

#### Domain 2: Image Creation, Management, and Registry

- Use CLI commands such as list, delete, prune, rmi, etc to manage images
- Inspect images and report specific attributes using filter and format
- Push an image to a registry
- Pull an image from a registry
- Describe how image layers work
- Display layers of a Docker image
- Describe how image deletion works
- Demonstrate tagging an image
- Tag an image
- Utilize a registry to store an image
